jQuery, signalR, thread programming, console application, winforms

1401 Days

Interbizy

In this project we have made a B2B website which can be very useful for small scale organization to communicate with other organization to fulfill their demand at one place with better option. Basically all organization has to register their product and services on this website and the demanding organization can contact on the basis of their demand to the respective organization for further process. Here an organization can compare different product and services of different organization and can go for the best and establish their product and service in the market. In this project to contact with other organization we have also included chat so that an organizations can communicate with each other easily and can discuss further detail over there. Here in this project one can discuss their idea with other connected organization, can gather market status and accordingly come up with new product and services.
